The Art of Magnetism

Sofia Kantorovich

28. Juni 2018, 18:00–19:30 Uhr

Campus-Pavillon am Campus, Hof 1, Spitalgasse/Alser Straße, 1090 Wien

Arts & Science

The background of the lower half of the poster is a complex, black and white visualization of magnetic field lines. The lines are dense and form two distinct, fan-like patterns that appear to originate from points on the left and right sides, spreading outwards and downwards. The overall effect is a textured, almost crystalline appearance.

The project Art of Magnetism is an interdisciplinary collaboration between scientists from the Faculty of Physics and artists, exploring the ideas of magnetism and soft matter. In this

event, we will show some project results and discuss how magnetism manifests itself in small particles, and how beautiful the patterns created by magnetic fields can be.
