19. November 2018

16:30 Einlass
17:00 Boltzmann Lecture 2018

Ausklang bei kleinen
Erfrischungen

For thousands of years we have been looking at the universe with our eyes. But most of the universe is dark and will never be observable with electromagnetic waves. Since 14 September 2015, everything is different: Gravitational waves were discovered! We have obtained a new sense and finally we can listen to the dark side of the universe. The first sounds that we heard were from unexpectedly heavy Black Holes. And nobody knows what other dark secrets are waiting for us out there.

Fakultät für Physik, Universität Wien

Lise-Meitner-Hörsaal, 1. Stock

Haupteingang: Strudlhofgasse 4, 1090 Wien
