„T-witts on the soft hair program“

Abstract:

We study the nontrivial diffeomorphisms and the associated symmetry algebras near a bifurcate horizon of a generic black hole.

In particular, we explore possible near horizon falloff and boundary conditions.

We discuss potential application of these analyses for the black hole microstate problem.

Zeit: Dienstag, 08.10.2019, 13.45

Ort: TU Wien, Wiedner Hauptstraße 8, Red Area, 7th floor,
Seminar Room DC 07 A15
