***“Probing the quantum nature of gravity
by (thought) experiment”***

Abstract:

After introductory remarks on the classical/quantum alternative I will discuss mainly the possibility of using gravity as an entanglement mediator as detailed in recent papers by Belenchia, Wald et al. and briefly the practical impossibility of single graviton detection.

Zeit: Dienstag, 18.06.2019, **13:15**

Ort: Arbeitsgruppe: Gravitation, Währinger Straße 17,
common room, 1. Stock
