***„Probabilities and Signalling in QFT“***

## **Abstract:**

I will talk about a way to compute transition probabilities that works directly that the level of probabilities and not amplitudes. The formalism guarantees that the initial and final states are always linked by a chain of retarded propagators and it has a nice diagrammatic approach.

**Zeit:** Dienstag, 14.5.2019 **16:15**

**Ort:** Erwin-Schrödinger-Hörsaal, Boltzmannngasse 5, 5. Stock
