# From Climate Change to the Climate Crisis. Implications.

12 December 2022

*The Physics Colloquium is a series of public lectures hosted by the Faculty of Physics of the University of Vienna, featuring internationally renowned speakers covering the full breadth of our fields of research.*

## Helga Kromp-Kolb

BOKU Center for Global Change and Sustainability  
University of Natural Resources and Life Sciences  
Vienna, Austria

## From Climate Change to the Climate Crisis. Implications.

The change in climate, triggered by human activities, has long since become a societal climate crisis. The implications are far-reaching and require “a full transformation of our way of doing business” (A. Merkel 2021). And we need to do that fast. There are also consequences of some urgency for the science system.

**Monday, 12 December at 13:30–15:00**

A light lunch buffet will be offered before the lecture at 13:00.

### Lise-Meitner lecture hall

Faculty of Physics, University of Vienna  
Strudlhofgasse 4, 1090 Vienna
