*„Electroweak input schemes in
Standard Model effective field theory“*

Abstract:

Standard Model effective field theory (SMEFT) enables us to universally describe the effects of heavy new physics at lower energy scales.

Recently, there has been a lot of progress on calculating next-to-leading order (NLO) effects in SMEFT.

In this talk, we will discuss how the choice of the electroweak input scheme influences the convergence at NLO and how universal, scheme-dependent corrections can be resummed.

Zeit: Dienstag, 12.12.2023, 16:15 h

Ort: Erwin-Schrödinger-Hörsaal, Boltzmannngasse 5, 5. Stock
